
a
b
Pretrained gap, class removed at the name
Pretrained gap, class removed at the decision point
Finetuned: Ben's spillover, class removed at his name
Example individual seed
Control: random direction removed
Effect, class removed / Effect, intact
Embedding
Block number
Copying head
Control: random other head, same block
Control: most attentive head, other block

1M
Gap recreated by steering (nats)
$y = 0.68x$
× Control: random direction
Villain–kind gap, G
(pretrained model, nats)
Villain–kind gap, one head ablated / Villain–kind gap, intact
Model size
Spillover, neutral + transplant / Spillover, "Ben steals" finetune
Ben's embedding
Block 1 attention
Block 1 MLP
Blocks 2+
Transplant from "Ben steals" finetune into neutral finetune
